Unpacking Menstrual Equity: Insights from India

The past decade has seen increasing attention to women's health, adolescent health, and sexual and reproductive health. Amidst this, we have seen the steady growth in programmatic and policy attention to menstrual hygiene management. We are now seeing a pivotal shift from "hygiene" and hygienic management to "menstrual health" and wellbeing, and swirling discussions around period poverty and menstrual equity. In this discussion, I will attempt to unpack these multi-faceted concepts through illustrations, experiences and data from India, and invite you to join me in delving into these bloody waters!
